PROFESSIONAL SUMMARY

I am a graduate IT professional with a Bachelor of Information Technology from QUT. I have a strong customer-facing background combined with technical problem-solving skills developed through hospitality, field-based work and hands-on projects. Known for calmly supporting users, translating complicated technical concepts into plain language, and working independently in fast-paced and high-responsibility environments.

PROJECTS

QLD Ranger App – Milestone API (Backend) *University Capstone*

Node.js, Express, Supabase, REST API

- Created the milestone-tracking feature of a 4-person capstone backend for the Queensland Rangers, a communication and file sharing platform built using Rest Endpoints (Node,js, Express, Supabase)
- Used PostgreSQL triggers to automate progress calculations
- Wrote an end-to-end Jest test suite with 76 tests, as well as Swagger and Zudoku API documentation to deliver to the Queensland government during handover.

Movies Intergalactic (In Development) *Personal Project*

React, Vite, Tailwind, DaisyUI, OMDB API

- A movie search and rating comparison project to practice component architecture, state management and API integration. In active development, with progress visible on GitHub.

WORK EXPERIENCE

ServiceStream - *Gas Meter Reader* Aug 2023 - Present

- Managed high-volume daily service routes with zero supervision, consistently exceeding performance targets and operational KPIs
- Leveraged mobile field technology to accurately document data while upholding rigorous safety and operational procedures as well as troubleshooting issues on the spot
- Resolved on-site stakeholder inquiries by translating complex technical issues into clear format

Bavarian and Oasis Cruising - *Bartender / Hospitality Professional* Sep 2021 – Apr 2023

- Acted as the primary point of contact for technical POS troubleshooting and customer service issues to maintain a professional and calm service during peak periods
- Coordinated with team members to identify and resolve customer issues with composure under pressure
- Collaborated in a high-pressure team environment, utilizing clear communication to effectively manage competing priorities.

EDUCATION

Queensland University of Technology Nov 2025

Bachelor of Information Technology, Computer Science, Minors: Data, Cloud Computing

- Core Competencies: Software Development, Enterprise Systems, Blockchain Technology, Data-Centric Computing
